

USC University of
Southern California

Research Position in Keck School of Medicine, USC

Hayoun Lee
Associate Professor
Department of Molecular Microbiology and Immunology
Keck School of Medicine, USC

There is an opening for a research position in Dr. Hayoun Lee's laboratory. Dr. Lee's lab is studying HIV drug resistance and incidence surveillance by combining next-generation sequencing, artificial intelligence, bioinformatics, statistical inferences, and cloud computing. This is a good opportunity to engage in clinical research, learn statistical analyses, and web-based software development. More details on Dr. Lee's research can be found here www.hayounlee.org To apply, send your CV along with official or unofficial transcript to hayoun@usc.edu
